PORTFOLIO

[Portfolio link ↗](#)

PROJECTS

[Walmart's Retail insights optimization ↗](#)

Jun 2025 - Jul 2025

Analyzed sales growth, customer segmentation, and product performance using advanced MySQL queries. I identified top-performing branches, profitable product lines, and anomalies in sales transactions to improve strategies. I segmented customers into spending tiers, identified repeat buyers, and analyzed payment preferences by city. I delivered actionable insights through SQL-driven analysis, enhancing decision-making with clear visualizations and reports.

[KPMG data analysis with Excel ↗](#)

May 2025

Cleaned and standardized customer, transaction, and demographic data, ensuring consistency and accuracy for analysis. I conducted segmentation by wealth, gender, and industry, identifying key customer groups and behavioral trends. I analyzed sales trends, product performance, and customer purchase patterns, providing actionable insights into revenue drivers. Additionally, I estimated potential revenue and calculated customer lifetime value (CLV) to highlight high-value customer segments.

SKILLS

- Advanced Excel
- Power Query
- C#
- SQL
- MS-PowerPoint
- Generative AI Development

Data Analytics

Apr 2025 - Present

Internshala, Virtual

[Airline Performance Analysis using Power BI ↗](#)

May 2025 - Jun 2025

Transformed and cleaned airline datasets in Power Query, standardizing the data for visualization and analysis. I created DAX measures to analyze passenger bookings, ticket statuses, and flight performance metrics. I built interactive dashboards with compact visuals for flight operations and customer insights. Additionally, I configured relationships, slicers, and drill-throughs, enabling dynamic analysis and real-time reporting via Power BI Service.

[J.P. Morgan classification of legal documents ↗](#)

Apr 2025

Automated classification of legal documents using CRISP-DM, saving 360,000+ hours annually. I developed a machine learning pipeline to identify patterns in 150+ attributes of credit contracts. This reduced errors in loan servicing and accelerated document review, enhancing operational efficiency. I documented the whole product life cycle of the analytics project, aligning with strategic automation goals.
